

DOCTORAL DISSERTATION DRAFT

Reliability, Robustness, and Reproducibility in IMDB Sentiment Classification

A Doctoral Dissertation Draft and Reproducible Research Record

[Candidate name]

[University and department]

[Month Year]

This document is a submission-style template and research record.
It is not a completed empirical thesis until results and citations are verified.

Declaration

I declare that the final submitted version will distinguish original work from prior scholarship, disclose assistance and data sources, and contain only results reproducible from the archived code and artifacts. Replace this text with the institution-approved declaration before submission.

Abstract

This dissertation draft studies reliability in binary movie-review sentiment classification. The completed study will compare sparse lexical and pretrained transformer systems using a locked split, nested validation, uncertainty intervals, calibration analysis, perturbation tests, structured error analysis, and external validation. This draft intentionally reports no fabricated empirical findings.

Acknowledgements

[Insert acknowledgements, funding statement, institutional support, collaborator roles, and declarations of conflicts of interest.]

Reader's note

Square-bracketed material is a required evidence placeholder. Replace it only with an approved institutional field, a verified primary source, or an artifact produced by the versioned experiment protocol.

Table of contents

Chapter 1 Introduction; Chapter 2 Literature Review; Chapter 3 Data, Ethics, and Governance;
Chapter 4 Methodology; Chapter 5 Experimental Results; Chapter 6 Analysis; Chapter 7
Discussion; Chapter 8 Conclusion; Appendices A through F.

List of tables and figures

[Populate automatically from the final typesetting source. Each table and figure must cite its manifest, configuration, split identifier, and generated artifact path.]

Problem statement

Sentiment classification is often summarized by a single benchmark score. That practice can conceal selection bias, uncertain estimates, poorly calibrated probabilities, and brittle behavior under modest input changes. This dissertation treats reliability as an empirical question rather than an assumed consequence of high accuracy.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Research gap

The research gap concerns the joint evaluation of discrimination, calibration, robustness, explanation faithfulness, and transfer using one locked and auditable protocol. A model ranking is useful only when the assumptions behind the ranking are transparent and its uncertainty is reported.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Research questions

RQ1 compares sparse lexical and pretrained transformer systems on discrimination, calibration, uncertainty, and compute cost. RQ2 examines controlled label-preserving perturbations. RQ3 characterizes errors using a pre-specified taxonomy. RQ4 assesses whether conclusions transfer to external review datasets.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Contributions

The intended contributions are a leakage-safe experiment architecture, a registered evaluation protocol, a structured error-analysis process, and an artifact-oriented reproducibility record. Contributions must be revised after results are available; they are not claims of completed novelty.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Scope

The study is limited to binary sentiment labels and review-style text. It does not claim to infer author identity, mental state, ideology, or universal preference. Results must not be generalized beyond the evaluated language, domain, time period, and label construction.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Thesis roadmap

The remaining chapters review verified scholarship, document data governance, specify the protocol, present generated results, analyze failures, and discuss limitations. Appendices preserve the evidence needed for independent reproduction.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Review method

Before submission, define databases, search queries, publication-date boundaries, inclusion criteria, exclusion criteria, and the screening process. Store exported bibliographic records and a source-selection log in the archival package.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Lexical sentiment modelling

Review classical bag-of-words, TF-IDF, linear classification, word n-grams, and character n-grams. Explain their assumptions, computational characteristics, interpretability strengths, and vulnerabilities to lexical variation using verified primary sources.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Pretrained language models

Review contextual encoders, fine-tuning procedures, tokenizer choices, truncation, training stability, and compute requirements. Identify which claims concern general language understanding and which have been demonstrated specifically for sentiment classification.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Evaluation leakage

Review why preprocessing, feature extraction, model selection, threshold selection, calibration, and error-category design must be separated from held-out evaluation. Tie every protocol safeguard to a cited methodological rationale.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Calibration

Review probability calibration, reliability diagrams, Brier score, expected calibration error definitions, and post-hoc calibration. State the selected ECE binning and weighting rule before observing results.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Robustness

Review semantic-preserving perturbations, adversarial evaluation, distribution shift, and the distinction between sensitivity and robustness. Every transformation in the final study requires a validity argument and documented examples.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Interpretability

Review global coefficient analysis, local explanations, attribution methods, and faithfulness evaluation. Do not equate an attractive explanation with a causal or faithful explanation without empirical validation.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Synthesis

End the chapter with a table mapping each research question to the reviewed gap, selected measure, competing explanations, and evidence required to support a conclusion.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Dataset provenance

Record the canonical source, licence, acquisition date, source URL, version identifier, SHA-256 checksum, and any conditions on storage or quotation. The current CSV must be treated as immutable after verification.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Labels and population

Describe how positive and negative labels were produced by the source dataset. Binary labels are an operational target, not a complete representation of sentiment, irony, mixed affect, or audience response.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Preprocessing

Specify normalization separately for sparse and transformer models. Any learned representation, including vocabulary, inverse document frequency, calibration mapping, or normalization statistic, must be fitted only on training data.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Ethical limits

Discuss copyright, quotation limits, privacy expectations, representational harms, and deployment risks. Movie-review classification is low stakes relative to clinical, employment, credit, or legal domains; no result should be generalized to those settings.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Threats from duplicates

Describe exact and near-duplicate handling, train-test leakage risks, and checks for document overlap. Report counts before and after each deduplication decision and retain a reproducible record of removed rows.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Design

Create a deterministic stratified hold-out split, archive its row identifiers, and prohibit its use during model selection. Use nested cross-validation on training data for parameter selection and model comparison.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Baselines

The implemented configuration includes word TF-IDF logistic regression, calibrated linear SVM, and multinomial Naive Bayes. The final thesis protocol should add a majority baseline, character n-grams, and transformer models under comparable reporting rules.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Metrics

Declare ROC-AUC as the primary endpoint. Report PR-AUC, accuracy, balanced accuracy, precision, recall, F1, MCC, Brier score, calibration summaries, confidence intervals, timing, and resource use as secondary outcomes.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Uncertainty and comparisons

Use stratified bootstrap confidence intervals for each test metric. For paired model claims, add a predeclared paired bootstrap difference interval and a paired error test. State any multiplicity adjustment before comparing more than two models.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Reproducibility

Record configuration, Git revision, environment, data digest, seeds, split files, hardware, and generated artifact paths. For GPU experiments additionally record library versions, device type, CUDA/driver details, tokenizer revision, checkpoint revision, and deterministic settings.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Stopping rule

Lock the experiment matrix and analysis plan before the final test evaluation. Any analysis introduced after observing held-out results must be labelled exploratory and evaluated on a fresh partition or external dataset where feasible.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Results policy

This chapter contains no invented values. Insert each table and figure only after executing its locked configuration. Every result caption must name its dataset digest, split identifier, model configuration, seed set, and artifact path.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Primary comparison table

[Insert generated table: model, outer-CV mean and standard deviation, held-out ROC-AUC with 95% confidence interval, PR-AUC, F1, Brier score, runtime, and manifest path.]

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Calibration results

[Insert reliability diagrams and weighted-ECE/Brier results. Explain binning, calibration data separation, and whether a post-hoc method was applied.]

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Paired comparisons

[Insert paired bootstrap difference intervals and predeclared paired tests. State the estimand, decision threshold, and multiple-comparison handling.]

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Compute reporting

[Insert hardware table, wall-clock time, peak memory or accelerator memory, energy metric if available, and failed-run policy.]

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Perturbation protocol

[Insert pre-registered transformations: HTML formatting, punctuation, whitespace, truncation, and validated negation-sensitive transformations. Provide examples and label-preservation checks.]

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Robustness results

[Insert per-transformation metric and confidence-change tables, then distinguish observed sensitivity from a supported semantic-robustness claim.]

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Error taxonomy

[Insert codebook, sampling frame, annotator training procedure, independent labels, Cohen's kappa, reconciliation policy, and category frequencies with uncertainty.]

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Interpretability

[Insert global lexical features and local explanation examples only with a stated faithfulness evaluation. Avoid treating explanation scores as causal evidence.]

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

External validation

[Insert external dataset provenance, adaptation policy, performance results, and limitations. Do not call an internal test split external validation.]

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Answering RQ1

[Interpret the model comparison using generated confidence intervals, calibration results, and compute measurements. Avoid claims that exceed the evaluated data.]

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Answering RQ2

[Interpret robustness findings by transformation type, label-preservation evidence, and uncertainty. Explain whether observed differences matter practically.]

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Answering RQ3

[Interpret error-taxonomy findings with annotation agreement and sampling limitations.
Separate descriptive error patterns from causal explanation.]

Evidence status: [replace this field with a verified citation, a generated artifact
identifier, or an institution-approved statement before submission.]

Answering RQ4

[Interpret cross-dataset evidence with careful attention to label, genre, language, and temporal differences.]

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Validity threats

Discuss internal validity, construct validity, conclusion validity, and external validity. Include tuning bias, seed variation, measurement choices, annotation ambiguity, data drift, and unresolved limitations.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Conclusion

Summarize only the claims supported by the final generated evidence. State the protocol contributions, empirical conclusions, limitations, and carefully bounded future research directions.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Archival statement

Archive the final source document, bibliography, configuration files, lockfile, manifests, split identifiers, result tables, figure sources, code revision, and data-access instructions in accordance with the dataset licence and institutional policy.

Evidence status: [replace this field with a verified citation, a generated artifact identifier, or an institution-approved statement before submission.]

Appendix A: Literature evidence record 001

This controlled record is 1 of 18 in the appendix a: literature evidence record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Appendix B: Experiment record 016

This controlled record is 16 of 28 in the appendix b: experiment record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Configuration file and digest [Complete with evidence, identifier, and date.]

Git revision and environment [Complete with evidence, identifier, and date.]

Data digest and split identifier [Complete with evidence, identifier, and date.]

Seed, hardware, and runtime [Complete with evidence, identifier, and date.]

Generated result artifact and review [Complete with evidence, identifier, and date.]

Appendix B: Experiment record 017

This controlled record is 17 of 28 in the appendix b: experiment record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Configuration file and digest [Complete with evidence, identifier, and date.]

Git revision and environment [Complete with evidence, identifier, and date.]

Data digest and split identifier [Complete with evidence, identifier, and date.]

Seed, hardware, and runtime [Complete with evidence, identifier, and date.]

Generated result artifact and review [Complete with evidence, identifier, and date.]

Appendix B: Experiment record 018

This controlled record is 18 of 28 in the appendix b: experiment record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Configuration file and digest [Complete with evidence, identifier, and date.]

Git revision and environment [Complete with evidence, identifier, and date.]

Data digest and split identifier [Complete with evidence, identifier, and date.]

Seed, hardware, and runtime [Complete with evidence, identifier, and date.]

Generated result artifact and review [Complete with evidence, identifier, and date.]

Appendix B: Experiment record 019

This controlled record is 19 of 28 in the appendix b: experiment record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Configuration file and digest [Complete with evidence, identifier, and date.]

Git revision and environment [Complete with evidence, identifier, and date.]

Data digest and split identifier [Complete with evidence, identifier, and date.]

Seed, hardware, and runtime [Complete with evidence, identifier, and date.]

Generated result artifact and review [Complete with evidence, identifier, and date.]

Appendix B: Experiment record 020

This controlled record is 20 of 28 in the appendix b: experiment record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Configuration file and digest [Complete with evidence, identifier, and date.]

Git revision and environment [Complete with evidence, identifier, and date.]

Data digest and split identifier [Complete with evidence, identifier, and date.]

Seed, hardware, and runtime [Complete with evidence, identifier, and date.]

Generated result artifact and review [Complete with evidence, identifier, and date.]

Appendix B: Experiment record 021

This controlled record is 21 of 28 in the appendix b: experiment record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Configuration file and digest [Complete with evidence, identifier, and date.]

Git revision and environment [Complete with evidence, identifier, and date.]

Data digest and split identifier [Complete with evidence, identifier, and date.]

Seed, hardware, and runtime [Complete with evidence, identifier, and date.]

Generated result artifact and review [Complete with evidence, identifier, and date.]

Appendix B: Experiment record 022

This controlled record is 22 of 28 in the appendix b: experiment record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Configuration file and digest [Complete with evidence, identifier, and date.]

Git revision and environment [Complete with evidence, identifier, and date.]

Data digest and split identifier [Complete with evidence, identifier, and date.]

Seed, hardware, and runtime [Complete with evidence, identifier, and date.]

Generated result artifact and review [Complete with evidence, identifier, and date.]

Appendix B: Experiment record 023

This controlled record is 23 of 28 in the appendix b: experiment record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Configuration file and digest [Complete with evidence, identifier, and date.]

Git revision and environment [Complete with evidence, identifier, and date.]

Data digest and split identifier [Complete with evidence, identifier, and date.]

Seed, hardware, and runtime [Complete with evidence, identifier, and date.]

Generated result artifact and review [Complete with evidence, identifier, and date.]

Appendix B: Experiment record 024

This controlled record is 24 of 28 in the appendix b: experiment record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Configuration file and digest [Complete with evidence, identifier, and date.]

Git revision and environment [Complete with evidence, identifier, and date.]

Data digest and split identifier [Complete with evidence, identifier, and date.]

Seed, hardware, and runtime [Complete with evidence, identifier, and date.]

Generated result artifact and review [Complete with evidence, identifier, and date.]

Appendix B: Experiment record 025

This controlled record is 25 of 28 in the appendix b: experiment record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Configuration file and digest [Complete with evidence, identifier, and date.]

Git revision and environment [Complete with evidence, identifier, and date.]

Data digest and split identifier [Complete with evidence, identifier, and date.]

Seed, hardware, and runtime [Complete with evidence, identifier, and date.]

Generated result artifact and review [Complete with evidence, identifier, and date.]

Appendix B: Experiment record 026

This controlled record is 26 of 28 in the appendix b: experiment record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Configuration file and digest [Complete with evidence, identifier, and date.]

Git revision and environment [Complete with evidence, identifier, and date.]

Data digest and split identifier [Complete with evidence, identifier, and date.]

Seed, hardware, and runtime [Complete with evidence, identifier, and date.]

Generated result artifact and review [Complete with evidence, identifier, and date.]

Appendix B: Experiment record 027

This controlled record is 27 of 28 in the appendix b: experiment record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Configuration file and digest [Complete with evidence, identifier, and date.]

Git revision and environment [Complete with evidence, identifier, and date.]

Data digest and split identifier [Complete with evidence, identifier, and date.]

Seed, hardware, and runtime [Complete with evidence, identifier, and date.]

Generated result artifact and review [Complete with evidence, identifier, and date.]

Appendix B: Experiment record 028

This controlled record is 28 of 28 in the appendix b: experiment record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Configuration file and digest [Complete with evidence, identifier, and date.]

Git revision and environment [Complete with evidence, identifier, and date.]

Data digest and split identifier [Complete with evidence, identifier, and date.]

Seed, hardware, and runtime [Complete with evidence, identifier, and date.]

Generated result artifact and review [Complete with evidence, identifier, and date.]

Appendix C: Figure and table record 001

This controlled record is 1 of 14 in the appendix c: figure and table record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Figure or table identifier [Complete with evidence, identifier, and date.]

Generating command and source artifact [Complete with evidence, identifier, and date.]

Caption and intended claim [Complete with evidence, identifier, and date.]

Statistical uncertainty displayed [Complete with evidence, identifier, and date.]

Reviewer approval [Complete with evidence, identifier, and date.]

Appendix C: Figure and table record 002

This controlled record is 2 of 14 in the appendix c: figure and table record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Figure or table identifier [Complete with evidence, identifier, and date.]

Generating command and source artifact [Complete with evidence, identifier, and date.]

Caption and intended claim [Complete with evidence, identifier, and date.]

Statistical uncertainty displayed [Complete with evidence, identifier, and date.]

Reviewer approval [Complete with evidence, identifier, and date.]

Appendix C: Figure and table record 003

This controlled record is 3 of 14 in the appendix c: figure and table record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Figure or table identifier [Complete with evidence, identifier, and date.]

Generating command and source artifact [Complete with evidence, identifier, and date.]

Caption and intended claim [Complete with evidence, identifier, and date.]

Statistical uncertainty displayed [Complete with evidence, identifier, and date.]

Reviewer approval [Complete with evidence, identifier, and date.]

Appendix C: Figure and table record 004

This controlled record is 4 of 14 in the appendix c: figure and table record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Figure or table identifier [Complete with evidence, identifier, and date.]

Generating command and source artifact [Complete with evidence, identifier, and date.]

Caption and intended claim [Complete with evidence, identifier, and date.]

Statistical uncertainty displayed [Complete with evidence, identifier, and date.]

Reviewer approval [Complete with evidence, identifier, and date.]

Appendix C: Figure and table record 005

This controlled record is 5 of 14 in the appendix c: figure and table record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Figure or table identifier [Complete with evidence, identifier, and date.]

Generating command and source artifact [Complete with evidence, identifier, and date.]

Caption and intended claim [Complete with evidence, identifier, and date.]

Statistical uncertainty displayed [Complete with evidence, identifier, and date.]

Reviewer approval [Complete with evidence, identifier, and date.]

Appendix C: Figure and table record 006

This controlled record is 6 of 14 in the appendix c: figure and table record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Figure or table identifier [Complete with evidence, identifier, and date.]

Generating command and source artifact [Complete with evidence, identifier, and date.]

Caption and intended claim [Complete with evidence, identifier, and date.]

Statistical uncertainty displayed [Complete with evidence, identifier, and date.]

Reviewer approval [Complete with evidence, identifier, and date.]

Appendix C: Figure and table record 007

This controlled record is 7 of 14 in the appendix c: figure and table record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Figure or table identifier [Complete with evidence, identifier, and date.]

Generating command and source artifact [Complete with evidence, identifier, and date.]

Caption and intended claim [Complete with evidence, identifier, and date.]

Statistical uncertainty displayed [Complete with evidence, identifier, and date.]

Reviewer approval [Complete with evidence, identifier, and date.]

Appendix C: Figure and table record 008

This controlled record is 8 of 14 in the appendix c: figure and table record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Figure or table identifier [Complete with evidence, identifier, and date.]

Generating command and source artifact [Complete with evidence, identifier, and date.]

Caption and intended claim [Complete with evidence, identifier, and date.]

Statistical uncertainty displayed [Complete with evidence, identifier, and date.]

Reviewer approval [Complete with evidence, identifier, and date.]

Appendix C: Figure and table record 009

This controlled record is 9 of 14 in the appendix c: figure and table record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Figure or table identifier [Complete with evidence, identifier, and date.]

Generating command and source artifact [Complete with evidence, identifier, and date.]

Caption and intended claim [Complete with evidence, identifier, and date.]

Statistical uncertainty displayed [Complete with evidence, identifier, and date.]

Reviewer approval [Complete with evidence, identifier, and date.]

Appendix C: Figure and table record 010

This controlled record is 10 of 14 in the appendix c: figure and table record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Figure or table identifier [Complete with evidence, identifier, and date.]

Generating command and source artifact [Complete with evidence, identifier, and date.]

Caption and intended claim [Complete with evidence, identifier, and date.]

Statistical uncertainty displayed [Complete with evidence, identifier, and date.]

Reviewer approval [Complete with evidence, identifier, and date.]

Appendix C: Figure and table record 011

This controlled record is 11 of 14 in the appendix c: figure and table record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Figure or table identifier [Complete with evidence, identifier, and date.]

Generating command and source artifact [Complete with evidence, identifier, and date.]

Caption and intended claim [Complete with evidence, identifier, and date.]

Statistical uncertainty displayed [Complete with evidence, identifier, and date.]

Reviewer approval [Complete with evidence, identifier, and date.]

Appendix C: Figure and table record 012

This controlled record is 12 of 14 in the appendix c: figure and table record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Figure or table identifier [Complete with evidence, identifier, and date.]

Generating command and source artifact [Complete with evidence, identifier, and date.]

Caption and intended claim [Complete with evidence, identifier, and date.]

Statistical uncertainty displayed [Complete with evidence, identifier, and date.]

Reviewer approval [Complete with evidence, identifier, and date.]

Appendix C: Figure and table record 013

This controlled record is 13 of 14 in the appendix c: figure and table record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Figure or table identifier [Complete with evidence, identifier, and date.]

Generating command and source artifact [Complete with evidence, identifier, and date.]

Caption and intended claim [Complete with evidence, identifier, and date.]

Statistical uncertainty displayed [Complete with evidence, identifier, and date.]

Reviewer approval [Complete with evidence, identifier, and date.]

Appendix C: Figure and table record 014

This controlled record is 14 of 14 in the appendix c: figure and table record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Figure or table identifier [Complete with evidence, identifier, and date.]

Generating command and source artifact [Complete with evidence, identifier, and date.]

Caption and intended claim [Complete with evidence, identifier, and date.]

Statistical uncertainty displayed [Complete with evidence, identifier, and date.]

Reviewer approval [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 001

This controlled record is 1 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 002

This controlled record is 2 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 003

This controlled record is 3 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 004

This controlled record is 4 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 005

This controlled record is 5 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 006

This controlled record is 6 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 007

This controlled record is 7 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 008

This controlled record is 8 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 009

This controlled record is 9 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 010

This controlled record is 10 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 011

This controlled record is 11 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 012

This controlled record is 12 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 013

This controlled record is 13 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 014

This controlled record is 14 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 015

This controlled record is 15 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix D: Error annotation record 016

This controlled record is 16 of 16 in the appendix d: error annotation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Sampling frame and item identifier [Complete with evidence, identifier, and date.]

Independent annotator labels [Complete with evidence, identifier, and date.]

Codebook version [Complete with evidence, identifier, and date.]

Reconciliation outcome [Complete with evidence, identifier, and date.]

Quotation/licence check [Complete with evidence, identifier, and date.]

Appendix E: External-validation record 001

This controlled record is 1 of 12 in the appendix e: external-validation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Dataset provenance and licence [Complete with evidence, identifier, and date.]

Schema/label mapping [Complete with evidence, identifier, and date.]

Adaptation policy [Complete with evidence, identifier, and date.]

Results artifact [Complete with evidence, identifier, and date.]

Transfer limitation [Complete with evidence, identifier, and date.]

Appendix E: External-validation record 002

This controlled record is 2 of 12 in the appendix e: external-validation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Dataset provenance and licence [Complete with evidence, identifier, and date.]

Schema/label mapping [Complete with evidence, identifier, and date.]

Adaptation policy [Complete with evidence, identifier, and date.]

Results artifact [Complete with evidence, identifier, and date.]

Transfer limitation [Complete with evidence, identifier, and date.]

Appendix E: External-validation record 003

This controlled record is 3 of 12 in the appendix e: external-validation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Dataset provenance and licence [Complete with evidence, identifier, and date.]

Schema/label mapping [Complete with evidence, identifier, and date.]

Adaptation policy [Complete with evidence, identifier, and date.]

Results artifact [Complete with evidence, identifier, and date.]

Transfer limitation [Complete with evidence, identifier, and date.]

Appendix E: External-validation record 004

This controlled record is 4 of 12 in the appendix e: external-validation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Dataset provenance and licence [Complete with evidence, identifier, and date.]

Schema/label mapping [Complete with evidence, identifier, and date.]

Adaptation policy [Complete with evidence, identifier, and date.]

Results artifact [Complete with evidence, identifier, and date.]

Transfer limitation [Complete with evidence, identifier, and date.]

Appendix E: External-validation record 005

This controlled record is 5 of 12 in the appendix e: external-validation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Dataset provenance and licence [Complete with evidence, identifier, and date.]

Schema/label mapping [Complete with evidence, identifier, and date.]

Adaptation policy [Complete with evidence, identifier, and date.]

Results artifact [Complete with evidence, identifier, and date.]

Transfer limitation [Complete with evidence, identifier, and date.]

Appendix E: External-validation record 006

This controlled record is 6 of 12 in the appendix e: external-validation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Dataset provenance and licence [Complete with evidence, identifier, and date.]

Schema/label mapping [Complete with evidence, identifier, and date.]

Adaptation policy [Complete with evidence, identifier, and date.]

Results artifact [Complete with evidence, identifier, and date.]

Transfer limitation [Complete with evidence, identifier, and date.]

Appendix E: External-validation record 007

This controlled record is 7 of 12 in the appendix e: external-validation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Dataset provenance and licence [Complete with evidence, identifier, and date.]

Schema/label mapping [Complete with evidence, identifier, and date.]

Adaptation policy [Complete with evidence, identifier, and date.]

Results artifact [Complete with evidence, identifier, and date.]

Transfer limitation [Complete with evidence, identifier, and date.]

Appendix E: External-validation record 008

This controlled record is 8 of 12 in the appendix e: external-validation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Dataset provenance and licence [Complete with evidence, identifier, and date.]

Schema/label mapping [Complete with evidence, identifier, and date.]

Adaptation policy [Complete with evidence, identifier, and date.]

Results artifact [Complete with evidence, identifier, and date.]

Transfer limitation [Complete with evidence, identifier, and date.]

Appendix E: External-validation record 009

This controlled record is 9 of 12 in the appendix e: external-validation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Dataset provenance and licence [Complete with evidence, identifier, and date.]

Schema/label mapping [Complete with evidence, identifier, and date.]

Adaptation policy [Complete with evidence, identifier, and date.]

Results artifact [Complete with evidence, identifier, and date.]

Transfer limitation [Complete with evidence, identifier, and date.]

Appendix E: External-validation record 010

This controlled record is 10 of 12 in the appendix e: external-validation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Dataset provenance and licence [Complete with evidence, identifier, and date.]

Schema/label mapping [Complete with evidence, identifier, and date.]

Adaptation policy [Complete with evidence, identifier, and date.]

Results artifact [Complete with evidence, identifier, and date.]

Transfer limitation [Complete with evidence, identifier, and date.]

Appendix E: External-validation record 011

This controlled record is 11 of 12 in the appendix e: external-validation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Dataset provenance and licence [Complete with evidence, identifier, and date.]

Schema/label mapping [Complete with evidence, identifier, and date.]

Adaptation policy [Complete with evidence, identifier, and date.]

Results artifact [Complete with evidence, identifier, and date.]

Transfer limitation [Complete with evidence, identifier, and date.]

Appendix E: External-validation record 012

This controlled record is 12 of 12 in the appendix e: external-validation record appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Dataset provenance and licence [Complete with evidence, identifier, and date.]

Schema/label mapping [Complete with evidence, identifier, and date.]

Adaptation policy [Complete with evidence, identifier, and date.]

Results artifact [Complete with evidence, identifier, and date.]

Transfer limitation [Complete with evidence, identifier, and date.]

Appendix F: Reproducibility checklist 001

This controlled record is 1 of 12 in the appendix f: reproducibility checklist appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Command and expected artifact [Complete with evidence, identifier, and date.]

Configuration and seed [Complete with evidence, identifier, and date.]

Environment or hardware [Complete with evidence, identifier, and date.]

Checksum or revision [Complete with evidence, identifier, and date.]

Independent reproduction status [Complete with evidence, identifier, and date.]

Appendix F: Reproducibility checklist 002

This controlled record is 2 of 12 in the appendix f: reproducibility checklist appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Command and expected artifact [Complete with evidence, identifier, and date.]

Configuration and seed [Complete with evidence, identifier, and date.]

Environment or hardware [Complete with evidence, identifier, and date.]

Checksum or revision [Complete with evidence, identifier, and date.]

Independent reproduction status [Complete with evidence, identifier, and date.]

Appendix F: Reproducibility checklist 003

This controlled record is 3 of 12 in the appendix f: reproducibility checklist appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Command and expected artifact [Complete with evidence, identifier, and date.]

Configuration and seed [Complete with evidence, identifier, and date.]

Environment or hardware [Complete with evidence, identifier, and date.]

Checksum or revision [Complete with evidence, identifier, and date.]

Independent reproduction status [Complete with evidence, identifier, and date.]

Appendix F: Reproducibility checklist 004

This controlled record is 4 of 12 in the appendix f: reproducibility checklist appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Command and expected artifact [Complete with evidence, identifier, and date.]

Configuration and seed [Complete with evidence, identifier, and date.]

Environment or hardware [Complete with evidence, identifier, and date.]

Checksum or revision [Complete with evidence, identifier, and date.]

Independent reproduction status [Complete with evidence, identifier, and date.]

Appendix F: Reproducibility checklist 005

This controlled record is 5 of 12 in the appendix f: reproducibility checklist appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Command and expected artifact [Complete with evidence, identifier, and date.]

Configuration and seed [Complete with evidence, identifier, and date.]

Environment or hardware [Complete with evidence, identifier, and date.]

Checksum or revision [Complete with evidence, identifier, and date.]

Independent reproduction status [Complete with evidence, identifier, and date.]

Appendix F: Reproducibility checklist 006

This controlled record is 6 of 12 in the appendix f: reproducibility checklist appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Command and expected artifact [Complete with evidence, identifier, and date.]

Configuration and seed [Complete with evidence, identifier, and date.]

Environment or hardware [Complete with evidence, identifier, and date.]

Checksum or revision [Complete with evidence, identifier, and date.]

Independent reproduction status [Complete with evidence, identifier, and date.]

Appendix F: Reproducibility checklist 007

This controlled record is 7 of 12 in the appendix f: reproducibility checklist appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Command and expected artifact [Complete with evidence, identifier, and date.]

Configuration and seed [Complete with evidence, identifier, and date.]

Environment or hardware [Complete with evidence, identifier, and date.]

Checksum or revision [Complete with evidence, identifier, and date.]

Independent reproduction status [Complete with evidence, identifier, and date.]

Appendix F: Reproducibility checklist 008

This controlled record is 8 of 12 in the appendix f: reproducibility checklist appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Command and expected artifact [Complete with evidence, identifier, and date.]

Configuration and seed [Complete with evidence, identifier, and date.]

Environment or hardware [Complete with evidence, identifier, and date.]

Checksum or revision [Complete with evidence, identifier, and date.]

Independent reproduction status [Complete with evidence, identifier, and date.]

Appendix F: Reproducibility checklist 009

This controlled record is 9 of 12 in the appendix f: reproducibility checklist appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Command and expected artifact [Complete with evidence, identifier, and date.]

Configuration and seed [Complete with evidence, identifier, and date.]

Environment or hardware [Complete with evidence, identifier, and date.]

Checksum or revision [Complete with evidence, identifier, and date.]

Independent reproduction status [Complete with evidence, identifier, and date.]

Appendix F: Reproducibility checklist 010

This controlled record is 10 of 12 in the appendix f: reproducibility checklist appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Command and expected artifact [Complete with evidence, identifier, and date.]

Configuration and seed [Complete with evidence, identifier, and date.]

Environment or hardware [Complete with evidence, identifier, and date.]

Checksum or revision [Complete with evidence, identifier, and date.]

Independent reproduction status [Complete with evidence, identifier, and date.]

Appendix F: Reproducibility checklist 011

This controlled record is 11 of 12 in the appendix f: reproducibility checklist appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Command and expected artifact [Complete with evidence, identifier, and date.]

Configuration and seed [Complete with evidence, identifier, and date.]

Environment or hardware [Complete with evidence, identifier, and date.]

Checksum or revision [Complete with evidence, identifier, and date.]

Independent reproduction status [Complete with evidence, identifier, and date.]

Appendix F: Reproducibility checklist 012

This controlled record is 12 of 12 in the appendix f: reproducibility checklist appendix.

Use one record per verified source, experiment, figure, annotation batch, or review decision. Do not treat an unfilled record as evidence.

Command and expected artifact [Complete with evidence, identifier, and date.]

Configuration and seed [Complete with evidence, identifier, and date.]

Environment or hardware [Complete with evidence, identifier, and date.]

Checksum or revision [Complete with evidence, identifier, and date.]

Independent reproduction status [Complete with evidence, identifier, and date.]
